DOE/EIA-0218(93-08)

## Weekly Coal Production

Production for Week Ended: February 20, 1993

Energy Information Administration

## **Summary**

U.S. coal production in the week ended February 20, 1993, as estimated by the Energy Information Administration from railroad car loadings, totaled 18 million short tons. This was 6 percent less than in the previous week, and 13 percent lower than in the comparable week in 1992.

Production east of the Mississippi River totaled 10 million short tons, and production west of the Mississippi River totaled 8 million short tons.

The United Mine Workers of America selective strike, which began on February 2, 1993, continued at coal mines and preparation plants owned and operated by Peabody Coal Company in Illinois, Indiana, and western Kentucky and by Eastern Associated Coal Corporation in West Virginia.

Figure 1. Coal Production

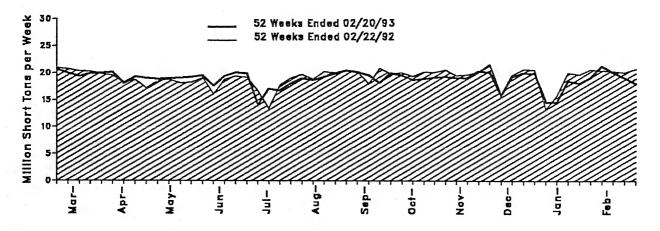

Table 1. Weekly U.S. Coal Production Overview

Production and Carloadings	Week Ended			52 Weeks Ended		
	02/20/93	02/13/93	02/22/92	02/20/93	02/22/92	Percent Change
Production (Thousand Short Tons)						
Bituminous Coal and Lignite	17,870	18,987	20,572	977,152	989,120	-1.2
		43	64	2.988	3,401	-12.1
Pennsylvania Anthracite	41	43	04	2,000	3,401	
Pennsylvania Anthracite	17,911	19,031	20,636	980,140	992,521	-1.2

Includes subbituminous coal.

Notes: All data are preliminary. Total may not equal sum of components because of independent rounding.
